

Lab: Setup

System Programming
CSE306

Instructor:

Prof. Yongwoo Lee (yongwoo@dgist.ac.kr)

Fastest Way: Use VSCode

- I don't recommend this option for various reasons.
- Follow the instructions
 - <https://jhyeok.com/vscode-ssh/> (Kor)
 - <https://carleton.ca/scs/2024/vscode-remote-access-and-code-editing/> (Eng)
- Use the config :

```
Host london
  HostName 10.150.3.64
  Port 20202
  User s{studentID}
```
- Put your student ID in {studentID}
 - Don't forget "s"
 - Default password s{studentID}

The screenshot displays the Visual Studio Code interface with the Extensions Marketplace open. The left sidebar shows a list of installed and available extensions. The main panel displays the details for the 'Remote Development' extension pack.

Visual Studio Code Remote Development Extension Pack

The **Remote Development** extension pack allows you to open any folder in a container, on a remote machine, or in the [Windows](#)

Notes

- You can only access the server in the campus.
 - You can use dgist vpn to access the server when you are not in campus

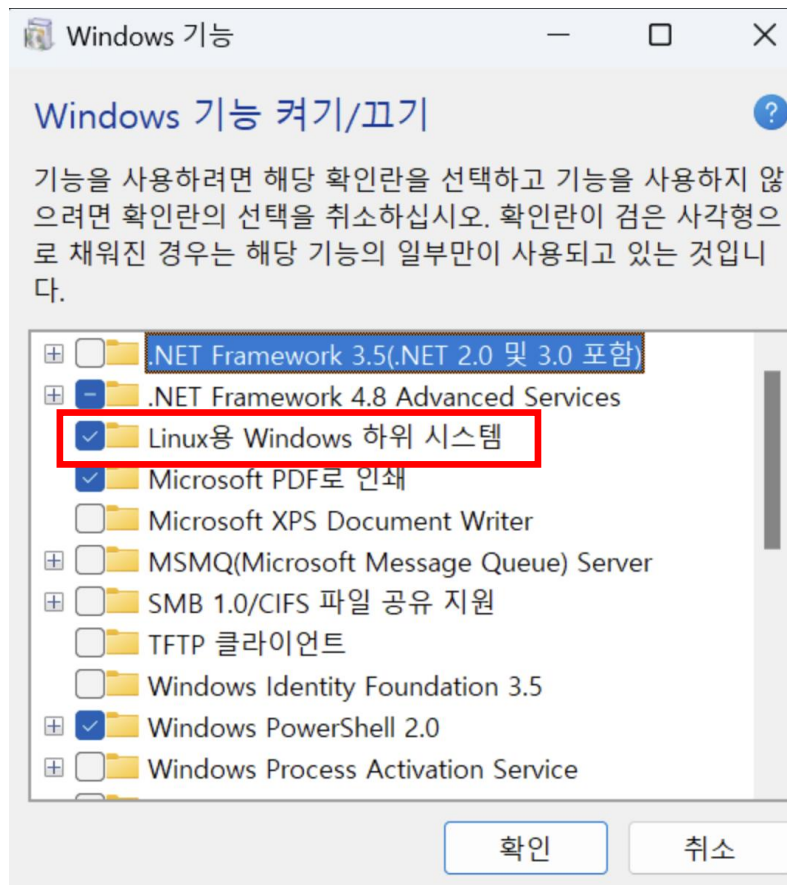

- Change Password
 - In vscode, you can open the terminal
 - Type “passwd”

Using Terminal

Windows

- Install WSL2 first
 - Windows Search > Windows 기능 켜기/끄기 클릭

Windows

- Install WSL2 first

- Open PowerShell
- Type `wsl --install`
- Optional

 `wsl.exe --update` # 최신 버전으로 업데이트

 `wsl --set-default-version 2` # WSL2을 기본 버전으로 설정

- <https://learn.microsoft.com/ko-kr/windows/wsl/install>

- <https://velog.io/@gynchoi17/WSL2-Windows-11에서-WSL2-설치하기>

Windows (Recommendation)

- Install Windows Terminal
- <https://m.blog.naver.com/islove8587/223425788190>
- Open Windows Store

SSH & SCP

- Use your local terminal. (Ctrl+Alt+T for Ubuntu, find “Terminal” or “Xterm” for MacOS)
- SSH: `ssh -p[port] [id]@[host name]`
 - `$ ssh -p20202 s2026xxx@london.coruslab.or.kr`
 - default password : s{studentID}
- SCP: `scp -P[port] [src] [dst]`
 - [src], [dst] – [id]@[host name]:[file path]
 - Local: ~/myFile
 - Remote: s2026X@london.coruslab.or.kr:~/myFile
 - Example: copy your file from the server to current directory
 - `$ scp -P20202 s2026X@london.coruslab.or.kr:~/myFile .`
 - Give -r option if you want to copy a directory.
 - `$ scp -r -P20202 myLocalDir s2026X@london.coruslab.or.kr:~`
- SFTP is also a good option

Welcome and Enjoy!
